## Description

Clear Lake, a 3,625-acre natural lake, is located near the town of Clear Lake, Cerro Gordo County, in north central Iowa, and has a drainage area of approximately 8,450 acres. The lake area is divided into the Clear Lake, Little Clear Lake, and the Ventura Marsh components. The primary problems relate to delivery and resuspension of sediments and nutrients, reduction in water depths, and loss of aquatic plants. Potential features to address these problems and restore ecosystem diversity include dredging, island creation, marsh restoration, and construction of off-shore rock dikes to reduce wind fetch and sediment resuspension. The reconnaissance study determined that there is justification for a detailed feasibility study of Clear Lake. A Continuing Authorities Program Section 206 project is underway to study only Ventura Marsh.
